PROFILE

Geology student specialising in geochemistry of oil and gas, with research, field and laboratory experience in petroleum geology and sedimentology. Skilled in well-log correlation, structure and isopach mapping, core description and geological mapping. Interested in petroleum systems and the energy industry, with international academic experience.

EDUCATION

Novosibirsk State University *Sep 2023 — May 2027*
Bachelor of Science in Geology, specialisation in Geochemistry of Oil and Gas *Novosibirsk/Russia*

Thesis: Geological structure of the productive inter-salt horizons of the Lower Cambrian in the southern Nepa-Botuoba Anteclise, Siberian Platform

CONFERENCE

64th International Scientific Student Conference (ISSC-2026) *Apr 2026*
Novosibirsk State University *Novosibirsk/Russia*

- "Correlation of Lower Cambrian inter-salt deposits in the southern Nepa-Botuoba Anteclise" — 3rd place.
- Abstract published in: Geology: Proceedings of the 64th International Scientific Student Conference. Novosibirsk: NSU, 2026. P. 31 (in Russian). elibrary.ru/nozzdv

INTERNATIONAL EXPERIENCE

Integrated Sedimentology, Stratigraphy and Paleontology Field Training *Aug 2025*
Peking University *Beijing/China*

- Described sedimentary sections in the field and determined lithological characteristics
- Collected and described samples; maintained field notebook documentation
- Collaborated with students from different countries in an international academic and cultural exchange
- Adapted to living and studying in a foreign cultural environment

LABORATORY EXPERIENCE

Trofimuk Institute of Petroleum Geology and Geophysics SB RAS *Sep 2025 — Present*
Research Assistant — Laboratory of Petroleum Geology of the Siberian Platform *Novosibirsk/Russia*

- Correlate well logs to subdivide Lower Cambrian inter-salt deposits in the southern Nepa-Botuoba Anteclise (Siberian Platform) for petroleum potential assessment
- Describe drill core and integrate core and seismic data into well-log interpretation
- Build structure and isopach maps of evaporite beds and stratigraphic horizons, and geological cross-sections, in Surfer, GisWell, Petrel and ArcGIS; prepare final figures in CorelDRAW

Sobolev Institute of Geology and Mineralogy SB RAS *July 2025*
Core Repository Placement *Novosibirsk/Russia*

- Described, systematically organised and labelled core samples

FIELD EXPERIENCE

Geological Mapping Field Practice *June — July 2025*
Novosibirsk State University *Republic of Khakassia/Russia*

- Conducted geological mapping, outcrop description and sampling in field teams
- Made field observations and preliminary interpretations of geological data
- Maintained geological documentation and field notebooks; used a geological compass

Research Field Practice *June — July 2024*
Novosibirsk State University *Altai Mountains/Russia*

- Participated in geological field investigations
- Collected and described rock samples
- Documented and interpreted field observations

SKILLS

- **Subsurface:** well-log correlation and interpretation, structure and isopach mapping, geological cross-sections, core description
- **Field:** geological mapping, sedimentology & stratigraphy, sampling, field documentation
- **Laboratory (coursework):** thin-section microscopy, GC–MS, pyrolysis
- **Software:** Petrel, Surfer, GisWell, ArcGIS, CorelDRAW, Microsoft Excel
- **Soft skills:** teamwork, communication, adaptability, problem solving

Languages

- Russian — native
- English — B2
